

Jonne Komulainen

Web Designer / Developer

Kuusamo, Finland

PROFILE

Simple ideas, carefully built

I'm Jonne, a web designer from Kuusamo, Finland. I enjoy turning straightforward ideas into websites and small web projects that are clear, useful and pleasant to use.

My work usually focuses on simplicity, usability and practical solutions. I like working with PHP, HTML, CSS and lightweight tools, especially when a project can stay fast and uncomplicated.

I believe good design should feel natural — doing what it needs to do without getting in the way.

WORK HISTORY

September 2026

■ Reindeer CMS

CSS / HTML / Markdown / MySQL / PHP

Reindeer CMS is a lightweight PHP and MySQL content management system built for simple websites that don't need a complicated setup.

It keeps things practical with easy page management, Markdown content, themes, plugins, media uploads, SEO tools and useful admin features — all wrapped in a clean and straightforward interface.

The idea is simple: make managing a website easy, flexible and uncomplicated.

■ LYHYT - Free Shorturl

CSS / MySQL / PHP / XHTML

LYHYT is a simple and free URL shortener for turning long links into clean, easy-to-share addresses.

It focuses on speed, simplicity and ease of use, making it quick to create short links without unnecessary steps or distractions.

The idea is straightforward: shorten a link, share it, and move on.
